**Duration**
5 Days

About the Course

The course aims to empower primary and secondary educators with the knowledge, skills, and tools necessary to integrate Artificial Intelligence (AI) into their teaching practices.

It focuses on understanding AI principles, exploring practical AI applications in education, and addressing ethical considerations to foster an inclusive and forward-thinking learning environment

Our Objectives

- **Gain a comprehensive understanding** of Artificial Intelligence and its core principles.
- **Identify and evaluate** AI tools and applications suitable for educational settings.
- **Integrate AI technologies into their teaching practices** to improve student engagement and learning outcomes.
- **Develop lesson plans** that incorporate AI tools, fostering a STEAM (Science, Technology, Engineering, Arts, and Mathematics) approach.
- **Understand the ethical implications** of AI in education and promote responsible use of AI technologies.
- **Address diverse learning needs using AI**, including supporting students with learning disabilities and enhancing the learning experiences of gifted students**.**

Target Group
School & high school teachers
